Re: Annual Reevaluation of Incidents and Camera Locations for 2025

On January 15th, 2025 the annual reevaluation of incidents and camera locations was completed pursuant to CALEA Standard 91.1.7(a), Standard 91.1.7(f) and General Order 12.6.2 – Camera Locations, which states: Technical Services will conduct an annual evaluation of the camera locations and the incidents that have occurred. A recommendation for changes will be included in the annual inspection report.

Major accomplishments during this review period

In 2025, 157 cameras were added/updated to locations across campus that will improve visibility in areas that include administrative, academic, and parking. We were able to update Walker Parking Deck with 90 new cameras and Spring Garden Parking Deck with 15 new cameras that used existing analog cabling. This saved the university money by not having to pull all the analog cables and install new data cables. We added 44 new cameras to new locations including Eberhart, EUC, Weatherspoon, Moore Building, and Sullivan. ITS worked to update their cameras within classrooms. Half of the classrooms were updated in 2024, and the other half were updated in 2025. ITS replaced their camera server. We were able to add a camera location on Spring Garden Deck to view the open activity field that had no coverage. TSU worked with Facilities Design and Construction on the Library Renovation and Performing Arts Center to be located at Tate Street and Gate City Blvd on camera locations, model and estimates.

Evaluation of the camera locations and incidents that have occurred

UNCG has over 1,300 cameras located across academic, residential, and open areas that allow for vast coverage of campus. The current infrastructure has proven to be effective in identifying when incidents occur and being able to take appropriate action with that information. Based on locations of incidents occurring on campus, we have good camera coverage.

Recommendations for future changes

We are working to improve on the following:

- Work with Parking Services to upgrade Oakland and McIver Parking Desks
- Work with Weatherspoon Art Gallery on their renovation which includes camera upgrades
- Work to get buildings with no cameras (11) upfitted with cameras on entrance/exits
- Work to get cameras that are inoperable or sun damaged, fixed and operable
- Work to get coverage for the Baseball Stadium
- Complete installation of cameras in Coleman, Bodford Arena and the Soccer Stadium
- Improve visibility around daycare centers on campus.
- Improve visibility on Oakland Avenue to view pedestrian and vehicular traffic.
- Continually update camera client and server software.
- Work with ITS and Facilities Design and Construction on cameras location and implementation during library renovation.
- Work with ITS and Facilities Design and Construction on camera location and implementation for the new Performing Arts Center to be located at Tate Street and Gate City Blvd.

The next annual review for the year 2025 is scheduled for January 2027.
